RECAP OF PAST EVENTS

Welcome back from winter break! We hope you had a good break from school and a Happy New Years so you all can be well reseted for this spring semester.

We have already had some events this semester but fret not as we have a lot more planned for you all coming up. We started the semester off with chem and math prep jams. These were then followed by workshops on scholarships, career fair prep, how to get better organized, how to apply for internships and research. Not everything here is just business though as we headed to Stanford for the SUMMA conference and had two small get togethers; one to kick off the semester and another to celebrate Valentine's day.

INTERESTED IN RESEARCH?

Two faculty members will be teaching research classes in the Fall 2024 semester.

The first is Dr. Bill Miller, who is teaching at the Davis center SCC branch.

The second, while not a chemistry research class instead being a CHEMTECH research class, is being taught by Dr. Tonya Atkins

Student Highlight

EDWARD CHHUN

As a community college student, I've participated in activities that have enhanced my educational experience and shaped my leadership abilities.

My time in MESA, collaborating with awesome student advisors, I've gathered a series of online workshops and boot camps from programming and AI engineering to cybersecurity. These initiatives assist MESA students - particularly underrepresented students - to pursue STEM careers. One success was a recent social workshop I led to prepare students for career fairs - 10 + participants signed up for a future career fair at Sacramento State University - where I've connected with career counselors to ensure equitable participation for MESA students.

Overall, my experiences as a student ambassador have allowed me to cultivate my leadership abilities & impact the professional and academic life of my students. I look forward to continuing to try to further the achievement of students at Sacramento City College and beyond.
